

Ease of installation

Easy and simple to install using industry standard connectors – no need to disassemble unit

Mains connection

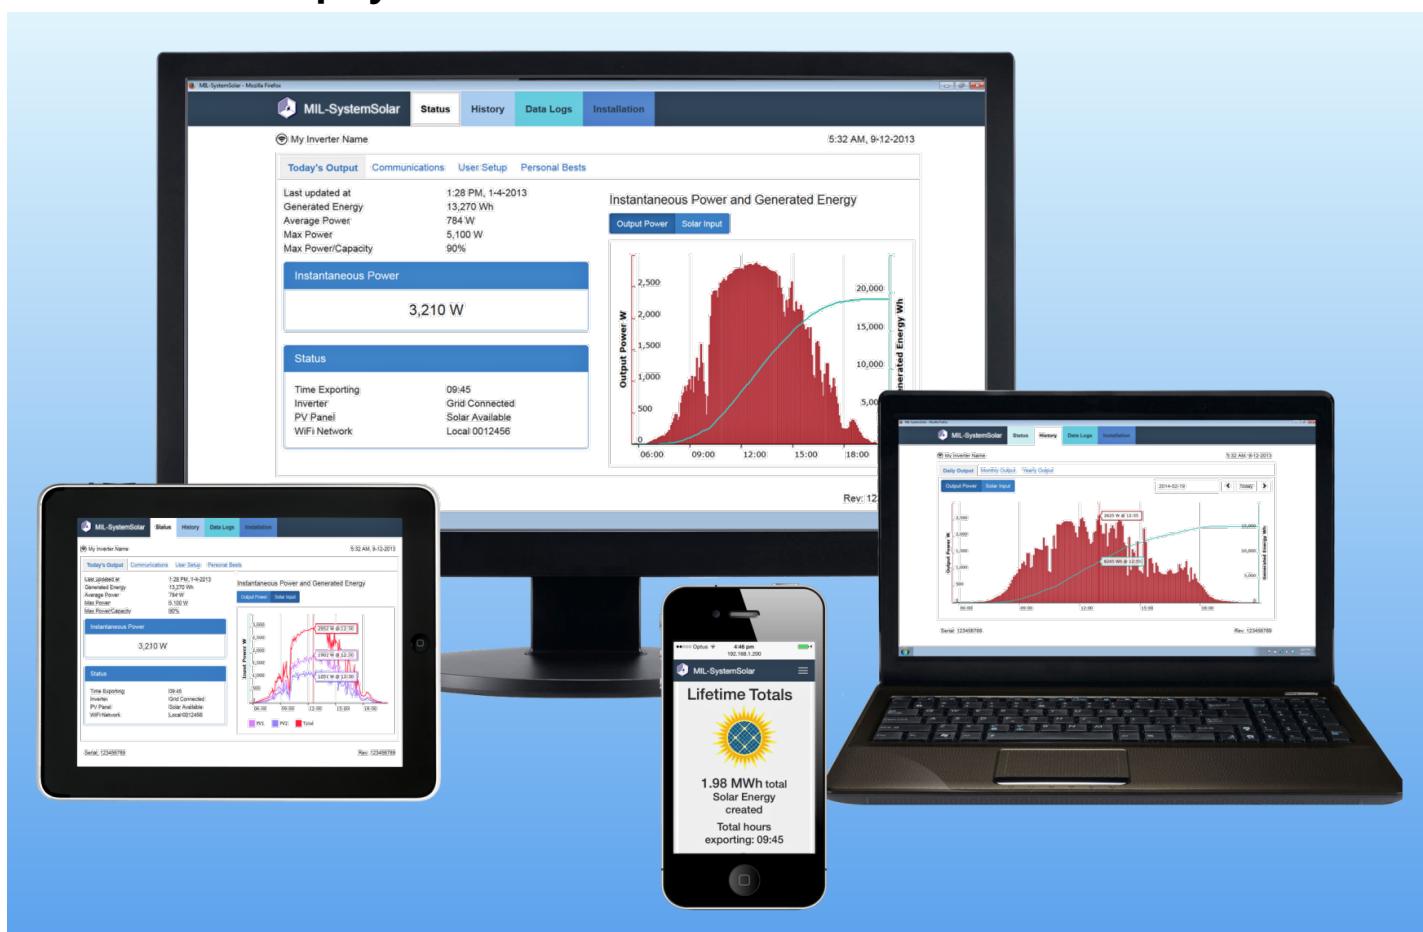

Wieland gesis® to IEC 61535

PV panel connections

Phoenix photovoltaic series

Standard Browser display interface

www.pvoutput.org

Automatic uploading* of data to independent global logging site for comparing and monitoring of live solar photovoltaic power and energy performance.

Apps available for many mobile devices providing live information monitoring any time, any place.

* when Eclipse is connected to a home/office network with Internet access

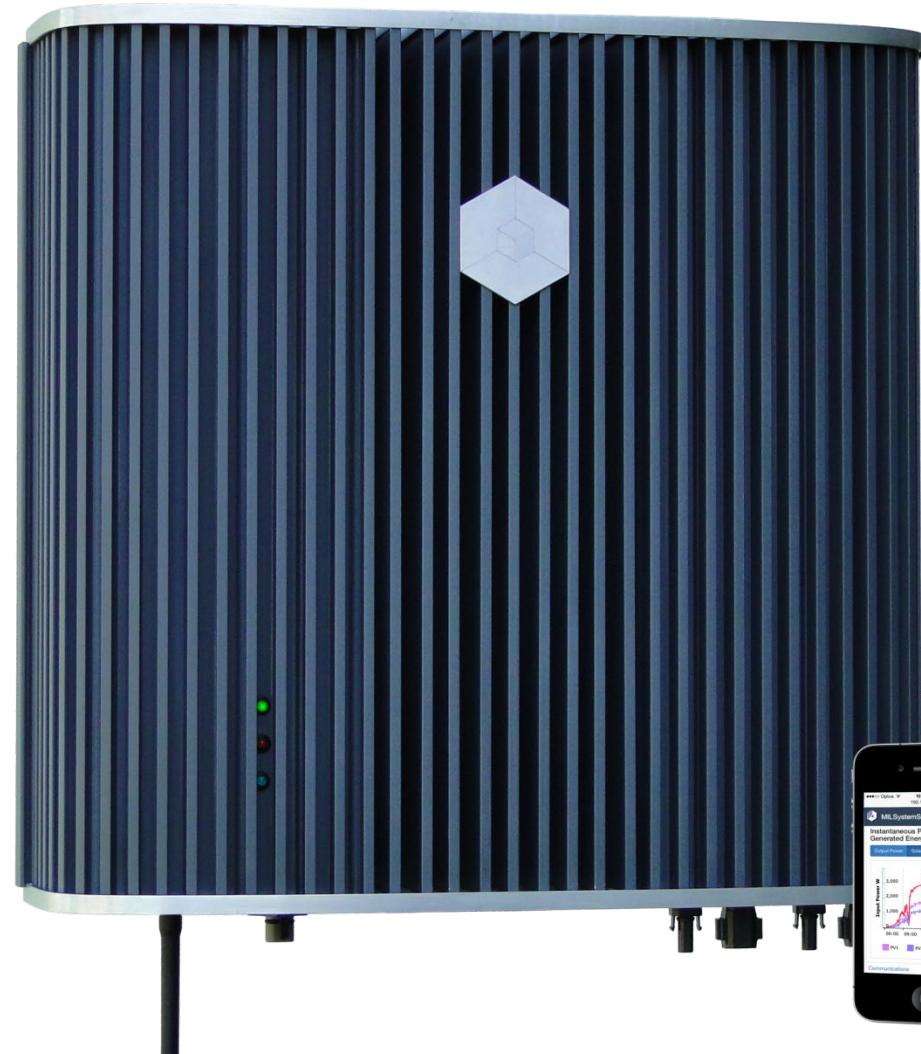

www.mil-systems.com.au/products_ms_solar

MIL-Solar

ECLIPSE Inverter with all new Reactive Power Control 3kW to 5kW

The Inverter that empowers you to connect to the Grid

Eclipse inverters from MIL-Solar enable you to connect to the Grid where network constraints are restricting installation approvals.

High Solar yield

- Dual Maximum power point tracking PV inputs
- Harvest sun all day – East to West
- Extended generating period - Early On, Late Off
- Reactive Power Control for highest daily yield

System Safety Protection

- Designed and built in Australia to the new Safety & Installation standards
- Inbuilt RCD – system wide earth fault detection
 - Solar Panel isolation monitoring
 - Wiring and isolator fault detection

Appearance

- Low profile to wall
- Low impact design - better blending with various house architectures
- Elegant styling with minimised status display
- Front facing cooling fins for ease of cleaning

Communications

- WiFi communications as standard on all models
- Inbuilt Browser interface to any networked device – PC, Tablet, Smart phone
- Inbuilt option to upload solar information to PVOutput.org

ECLIPSE 3000 / 3600 / 4200 / 5000 with Reactive Power Control

Unique robust technology. Designed for the extreme Australian Grid conditions and harsh environment.

The latest Eclipse RPC Solar Inverter is the ideal solution for maximising solar power output utilizing Reactive Power Control output to the grid and with two fully independent PV panel array input controls. Dual MPPT maximises power harvest from East, North and West PV arrays simultaneously. The all new Reactive Power Control maximises power fed into the grid by keeping the inverter connected and outputting where other technology inverters have to drop out. With an Eclipse RPC inverter you won't miss out on the opportunity to install solar and maximise your electricity production.

ECLIPSE 3000-I / 3600-I with Reactive Power Control

Single channel PV input models

	Technical data	Eclipse 3000-I	Eclipse 3600-I
Input (DC)			
Max. DC power		3150 W	3780 W
Maximum input voltage		750 V	750 V
Minimum input voltage - ON		90 V	90 V
MPPT operating range		90 V ... 600 V	90 V ... 600 V
Number of independent MPPT channels		1	1
Maximum operating input current		12 A	12 A
I _{sc} PV - Maximum input short circuit current		15 A	15 A
Output (AC)			
Rated power (Unity power factor)		3000 W	3600 W
Rated power conditions		230 V, 50 Hz	230 V, 50 Hz
Maximum AC VA (250V AC)		3000 VA	3600 VA
Nominal AC voltage		230 V	230 V
Maximum AC withstand voltage		300 V	300 V
Nominal AC frequency / range		50 Hz ± 5 Hz	50 Hz ± 5 Hz
Maximum output current		13 A	16 A
Power factor at rated power		1	1
Reactive Power Control		YES	YES
Variable Power factor – leading/lagging		±0.8	±0.8
AC mains connection phases		1 Φ	1 Φ
Efficiency			
Maximum efficiency / European weighted efficiency		97 % / 96 %	97 % / 96.3 %
Protection systems			
PV panel fault – Array isolation		YES	YES
Ground fault monitoring		YES	YES
DC reverse polarity protection – PV panel miswired		YES	YES
AC short-circuit current protection		YES	YES
AC miswired		YES	YES
'Safety switch' – Residual current monitoring unit		YES	YES
Protection class (IEC 62103)		I	I
Overtoltage category (IEC 60664-1)		III	III
Environment			
Dimensions (W / H / D)		490 / 519 / 185 mm	490 / 519 / 185 mm
Weight		23 kg	23 kg
Operating temperature range		-25°C to +50°C	-25°C to +50°C
Noise emission (typical)		25 dB(A)	25 dB(A)
Standby consumption (overnight)		1 W	1 W
Topology		Transformerless. Non galvanically isolated.	
Cooling method		Convection	Convection
Degree of protection (AS/IEC 60529)		IP44	IP44
Altitude		2000 m	2000 m
Maximum relative humidity (non-condensing)		100 %	100 %
Installation location		External. Sheltered from direct sun and rain.	
Features			
Display – Status / Information		LED / Browser	LED / Browser
WiFi Ethernet interface		YES	YES
Power Line Communications Ethernet interface		Optional	Optional
Ethernet wired RJ45 interface		Optional	Optional
Standard DC connections		Phoenix	Phoenix
Standard AC connections		Wieland gesis®	Wieland gesis®
Alarm output relay		Pending	Pending
DRED control		Pending	Pending
Warranty		Standard 5 Year	
Warranty – extended		Optional : 10 / 15 / 20 years	
Standards and approvals		AS 4777.2, AS 4777.3, ASNZS 3100, AS/NZS60950, AS/NZS 61000.6.3, AS/IEC 60529	

YES Included as standard feature on Eclipse model

Optional Refer sales representative for availability and pricing

Pending Pending release of new Australian standard AS4777, 2015

Eclipse 3000-II /3600-II /4200-II /5000-II with Reactive Power Control

Dual channel PV input models

	Technical data	Eclipse 3000-II	Eclipse 3600-II	Eclipse 4200-II	Eclipse 5000-II
